After a search he located her and this is the first visit they have had since the two were mere children.

We Can Save a Few Men \$175 on the HUDSON SUPER-SIX

Note These Important Facts
Prices Will Advance Soon

We have just been notified as follows about coming Super-Sixes:

There will be no change in models. This year's production is nearly sold out—both of open models and closed. The new production—starting December 1—will be built from materials contracted this year, at enormous advance in cost. And, to maintain present standards, those cars must cost \$175 more.

We Have Cars Here

We have a carload of cars now on hand at the present price. They will be sold at present prices while they last. After that, every car shipped to us will cost the higher price.

You can save that difference—\$175—by buying your Super-Six now. And you'll get the same model as buyers get who buy after December 1.

Consider that fact well.
**Next Year Will Be a
Super-Six Year**

The Super-Six this year came in as a stranger. It was like all strangers, received with some question.

The next season will start December 1 with 25,000 Super-Sixes running. And with 25,000 enthusiastic owners.

It will start with performance records,

which prove that this invention has doubled a motor's endurance.

It holds all stock-car records up to 100 miles. It holds the 24 hour record of 1819 miles. It won the Pike's Peak hill-climb against 29 famous rivals. It holds the ocean-to-ocean record—San Francisco to New York, made in 14 hours, 55 minutes less time than the next best record.

Next year the Super-Six, with all these records behind it, will hold the peak place, by itself.

Save by Deciding Now

If you want such a car—even next year—you will save \$175 by deciding now. Never again in all probability, can you buy a Super-Six at these prices.

Come and select the car you want before we sell all our allotment.
